

Adding and Pruning Priorities

1. When you create an assignment and select **Assign**, you will be given the option to include the skills you choose in Priorities as well:

2. Teachers can view the collection of Priorities for any class by selecting **Priorities** under that class in the **Classes** folder:

The screenshot shows the software interface with the 'Classes' folder expanded. A red arrow points to the 'Priorities' item in the folder tree. The main window displays a table of 79 priorities for a class named 'demo'. The table has columns for Date Added, Prioritize, and Description. A green arrow points to the 'Prioritize' column.

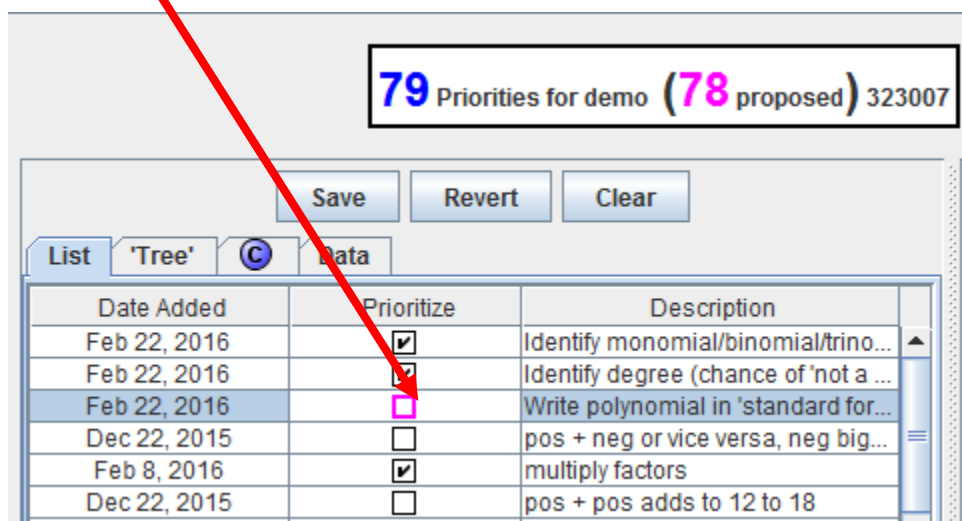

Date Added	Prioritize	Description
Feb 22, 2016	<input checked="" type="checkbox"/>	Identify monomial/binomial/trino...
Feb 22, 2016	<input checked="" type="checkbox"/>	Identify degree (chance of 'not a ...

Feb 8, 2016	<input checked="" type="checkbox"/>	Combo: given graph with mixed

A list of this class's Priorities will appear to the right. (Note that this list includes ALL problem types that have EVER been assigned to this class. Checked problem types appear on students' screens when in Priorities mode.)

3. **Sometimes you may want to prune Priorities**, either because they have been mastered by your class or because they are now less important skills to practice. Simply click on the checked box beside the Priority you wish to remove –
