

Collaborating on Priorities

Get More Math makes it easy to see which Priorities are currently being used by other teachers, in case teachers wish to collaborate or coordinate on this cumulative review feature.

1. (a) In your **Classes** folder, select any class and then **Priorities**. (b) In the center panel, find the window labeled **Other Teacher Priorities** and find the desired teacher and class.

The screenshot shows the software interface with a 'Classes' folder on the left. A red arrow labeled '(a)' points to the 'Priorities' folder within the 'demo' class. The main panel displays a table of priorities with columns for Date Added, Colleague Added, Prioritize, Colleague Priority, and Description. A box at the top right indicates '78 Priorities for demo 51006'. Below the table, a window titled 'Unmix Period 1' is open, showing a list of 'Other Teacher Priorities' for 'Spangler, Donnie', including 'Period 1', 'RTII Fall 2015', 'Period 4', and 'Period 3'. A green arrow labeled '(b)' points to the 'Period 1' entry in this list.

The table now shows both teachers' data, including the dates when Priorities were added and each teacher's currently active Priorities.

2. To coordinate Priorities with another teacher, simply select (or deselect) the check boxes beside the desired Priorities. Remember to click **Save** when you are done.
