

Day Scores (Daily Point Totals)

1. To view list of student's scores on a given day or a range of days, go to your **Classes** tab and click on any class, then select **Day Scores**. A calendar will appear in the center panel.

The screenshot shows a web interface for selecting a date to view scores. At the top, there is a text input field containing 'Algebra 1B'. Below it are two checkboxes: 'Use multiple days' (unchecked) with a 'How Many:' input field containing the number '7', and 'Score since' (unchecked). A 'Submit' button is located below these options. The main area features a calendar for the month of 'March' in the year '2016'. The calendar grid shows days from Sunday to Saturday. The date '10' (Thursday) is highlighted with a bright green square. The numbers 28, 6, 13, 20, and 27 are bolded in the calendar grid, likely representing the end of the month or specific days of interest.

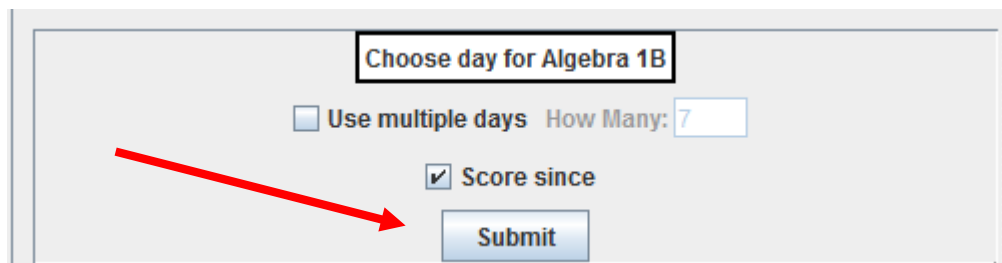

2. Click on any date and then **Submit** to access scores from that day.

3. Check **Use multiple days** (default number is 7) and **Submit** to access scores counted backwards from the highlighted day.

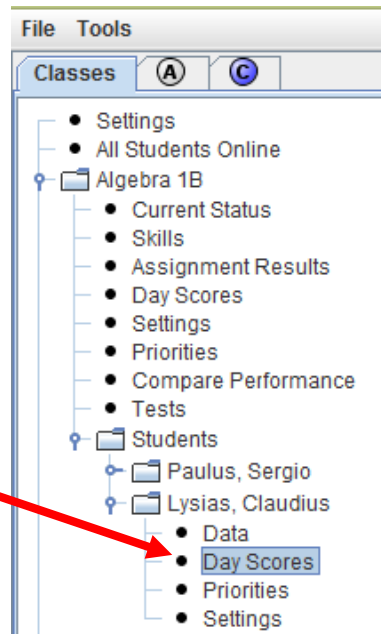

The screenshot shows a form titled "Choose day for Algebra 1B". It contains a checked checkbox labeled "Use multiple days" followed by a text input field containing the number "7". Below this is an unchecked checkbox labeled "Score since". At the bottom of the form is a blue "Submit" button. A red arrow points from the top left towards the "Use multiple days" checkbox.

4. To see students' cumulative scores from a certain date, check **Score since**, then click on the calendar date and **Submit**.

The screenshot shows the same form as above, but now the "Score since" checkbox is checked. The "Submit" button is highlighted with a blue border. A red arrow points from the left towards the "Submit" button.

5. To access an individual's scores, choose a student under any class in your **Classes** tab and select **Day Scores**.

Teaching Note: **Day Scores** can be useful for checking homework, if a certain number of Get More Math points have been assigned. Teachers can use this feature to pull up how many points each student has earned since the last class. (For example, on Monday click Friday's date and **Score since** to find out what was accomplished over the weekend.)
